

HEALTH CAMP FOR CONSUMPTIVES

Worthy Enterprise Established in Southern California—So Arranged That Patients May Be Self-Supporting.

A New York paper publishes an account of a successful effort recently made by Mr. N. O. Nelson, in Southern California, to provide for the poor classes. Mr. Nelson has established at Indio, in Southern California, what he calls a health camp for consumptives. We quote the following description of this worthy enterprise with the hope that it may encourage others to do likewise; for certainly no more beneficent work can be undertaken by anyone:

"The camp is located in a desert valley, cut off from the ocean by the mountains. There is no rain, no fog, no clouds. The winter days are all warm, the nights comparatively cold.

"The camp was established in December, 1902, to provide in part for the large number of consumptives and other invalids who go to Southern California. Most of the invalids have little means; they can not afford expensive sanitariums, and are not wanted by hotels and boarding houses.

"To meet the requirements of such patients, Mr. Nelson bought one hundred and twenty-five acres of land adjoining the Indio depot. This tract he has improved by sinking artesian wells, and by putting most of the land under cultivation, in order to give consumptives something to do.

"Tents, with all necessary equipment for sleeping and taking meals, have been set up. Land and water are free to those who have their own outfit. A small rental for tents is made to those who can not pay, and where necessary, board is given them. All expenses need not be more than from \$2.50 to \$4.00 a week.

"Work is provided for those who are able to do it, so that their care does not become a burden on the camp.

"The camp is situated in the midst of a sandy valley one hundred miles long and three to ten miles wide. The mountains on each side rise by degrees to four thousand and five thousand feet high. In some places in the foothills there are springs and vegetation.

"In the valleys most of the land has been taken up in the past few years. The crops of melons and vegetables are early and bring high prices. From \$160 to \$200 an acre is an ordinary yield. Alfalfa hay is cut ten times a year, giving twelve to fifteen tons an acre.

"When the campers get well enough to work, they buy or lease a few acres. They can either buy the land on the installment plan, or lease it on shares for such length of time as desired."

Alcohol and Tuberculosis.

Dr. S. A. Knopf, the eminent New York physician who has given a great deal of attention to the subject of tuberculosis, took occasion not long since in a scientific paper to condemn the popular notion that alcohol is a remedy for consumption. He says:

"There is an idea that alcohol is a remedy or even a specific remedy for consumption. There has never been a greater mistake made. Alcohol has never cured and never will cure tuberculosis. It will either prevent or retard recovery. It is like a two-edged weapon; on one side it poisons the system, and on the other side it cures the stomach and thus prevents this organ from properly digesting the necessary food. Truly pathetic are the results of this erroneous doctrine in the families of the poor, where, instead of procuring good nourishment for the invalid, liquor has been bought in far too large quantities, so that often there was not enough money left for food for the sufferer nor for the other members of the family."

Predisposition to Tuberculosis.

The abnormal fear of tuberculosis which haunts so many minds is bred of ignorance. The awful results of the "white terror" have impressed themselves upon all, but as with the aborigine, when he first encountered the gun-bearing explorer, the reason why is hidden. The native heard the gun speak and saw his brother fall. The sudden death terrified him. He did not stop to inquire the cause. He fled in abject fear.

Today the ravages of tuberculosis are stupendous. Are you inquiring into the why, or are you trembling lest it seize you? Are you trying to dodge an insatiable foe, or are you studying to give intelligent battle? The tenement dweller says, "I can not escape the plague, I will await my turn." The son or brother of a consumptive says: "It is in the family, I must suffer the same death." The weakened victim of intemperance or neglect of vital laws says: "My constitution is wrecked—I am no match for this relentless foe."

Dr. Knopf asks and answers the following pertinent query: "Who are the individuals who must be particularly careful so as not to be attacked by the almost ever present tubercle bacillus."

"There are four classes: First, those who have a hereditary predisposition to consumption; secondly, those who have weakened their system and thus predisposed themselves to consumption by the intemperate use of alcoholic beverages, by a dissipated life, by excesses of all kinds, etc.; thirdly, those whose constitution has been weakened through disease; fourthly, those whose occupations, trades or professions, such as printing, hat making, tailoring, weaving, and all occu-

pations where the worker is much exposed to the inhalation of various kinds of dust, have rendered them particularly liable to consumption."

Let every one take courage and live above tuberculosis. If you are already suffering from it strive to rise above it. Avoid alcoholic beverages, condiments, pastries, tea and coffee. Live out of doors, provide fresh air for your bed room, study the laws of your body and return to the natural way of living.

Food for Brain Workers.

Mental work requires much less food than does physical labor. Recent careful experiments which have been made, show that men engaged in active mental labor and abstaining from muscular exertion, require practically no more food than men at rest. This is a fact of very great importance for students, ministers, and other professional men whose occupation does not require any considerable amount of effort, since the taking of food in excess of that which is required results in the filling of the blood with poisons, and in consequence crowding of the tissues with these wastes and poisonous matters which interfere with all the bodily functions, and especially with the functions of the brain and nerves. Mental activity is clouded, sleep may be prevented, and all the effects of nervous exhaustion produced by a comparatively slight expenditure of energy, giving rise to languor, sometimes depression, and at other times irritability, confusion, and indecision of mind, even moroseness and melancholy.

That Tired Feeling.

The condition of lethargy produced by excessive eating or habitual drunkenness must be distinguished from fatigue due to work. Persons in this condition often decline to exercise because they "feel so tired." This state of lassitude and enervation cannot be overcome by rest. Carefully graduated exercises and regulation of the diet are the proper remedies. There are many chronic invalids whose sufferings and disability are wholly due to this cause, and who may be readily restored to usefulness by a spare and simple dietary combined with outdoor exercises, gradually increased in vigor and duration as the strength improves.

Water Purification.

A physician connected with the United States Agricultural department has called attention to the fact that an extremely small quantity of sulphate of copper will prevent the growth of algae in lakes, ponds and storage reservoirs, and will destroy typhoid and cholera germs. The question at once arises whether this method can be considered thoroughly hygienic. The probability is that the small amount of copper thus employed would be neutralized by combining with vegetable substances so that the water will be left practically pure; nevertheless, the addition of chemical substances to water cannot be considered the most desirable method of purification. Boiling and filtering through a Pasteur filter are really the best methods. Filters are cheap, and boiling is an easy and simple process. The old-fashioned charcoal and gravel filters cannot be relied upon.

Warning Against Tight Corsets.

Nature abhors a vacuum. There is no unoccupied space in the body; and to render any part of it smaller than nature designed, is to cause the organs occupying that part to diminish in size, or to crowd together, one upon another. In either case, nature's processes are sadly interrupted.—C. E. Hastings, M. D.

SOME SIMPLE DISHES.

Breakfast Toast.—Cut rather thin slices of bread into two or three pieces. Put these into the oven and let them bake very slowly for two or three hours, or until of a golden color and crisp throughout. This is an excellent substitute for breads and much more wholesome. It is delicious served with coconut or dairy cream or butter.

Coconut Cream.—Cut fresh coconut into thin slices and grind the nut very fine in a chopper or some strong hand mill. If nothing of this sort is available, the coconut may be grated. To each cup of the prepared nut add one cup of hot water, stirring and beating with a spoon to extract as much of the juice as possible. Drain off the liquid and add a similar quantity of hot water, and, after beating again very thoroughly, strain through a cloth or very fine sieve, pressing out all the liquid possible. This may be used at once as a substitute for milk, to be eaten with rice or other grains, or to prepare puddings or sauces. It is excellent served with granose flakes or eaten with zwieback. If placed on the ice for a few hours, the cream will rise to the top and may be taken off, making a pure coconut butter.

Strawberry Egg-nog.—Beat the yolk and white of one egg separately, and to each add one teaspoonful of sugar. To the yolk add one teaspoonful of lemon juice and two tablespoonfuls of strawberry juice. Stir in the white, leaving enough to serve as a meringue for the top.

DEEPLY IMPRESSED

The Effect of Emperor William's Visit to Tangier.

DEL CASSE POSTPONES QUESTION

It Is Shown by a Conference That It Is the Purpose to Adopt a Passive Attitude and Await the Development of Events.

Paris, April 5.—The Morocco incident is making a deeper impression and while calmness continues to prevail there is a growing sense of uneasiness or the shock which Emperor William's visit to Tangier and his declarations give to French policy. However for the present it is evident that the purpose is to adopt a passive attitude and await the development of events. This was shown by a conference at the foreign office between Foreign Minister del Casse and several deputies who wished to question him in the chamber concerning Morocco. The foreign minister asked for an adjournment of the questions, saying there was nothing to add to what he had already said in the senate. According to the questions were indefinitely postponed.

The Temps says the authorities version of Emperor William's remarks at Tangier make it useless to deny the disapproving character of such words, which "constitute almost the maximum sport of openly quarrelling with France that William III could attempt in order to be disagreeable."

However, the general tone of the press is singularly free from belittlement or menacing talk.

St. Petersburg.—The developments resulting from Emperor William's speech at Tangier continues to attract great attention in the press and in diplomatic circles. The sober view is that the German emperor seized on a favorable opportunity to read France a lesson for having Germany out of consideration in the French-British understanding regarding Morocco, with the view, possibly of compelling France to make a permanent renunciation of her aspirations regarding Metz and Lorraine, also with the practical purpose of securing a vote in the Reichstag next fall for a large naval program. There is no serious idea that the incident may lead to a conflict with Russia unfeeling, France will have to look to Great Britain to play the role of protector assumed by Russia when Germany threatened her in 1875, and there is a good deal of speculation on the subject of the new grouping of the powers. The home papers, however, declare that while the British press may bluster, Great Britain has scored her quid pro quo in Egypt and will leave France to take care of herself.

BEAUTIFUL LITTLE ANARCHIST.

Wealthy Man and Two Women Arrested Suspected of Nihilistic Ideas.

London, April 1.—Dispatches from St. Petersburg to the Daily Mail and the Standard report several arrests of prominent terrorists belonging to the inner or "bomb" section. According to the Daily Mail's dispatch, one of the persons arrested is a wealthy man named Zaritsky and two women. One of these latter, named Ivanovskaya, an anarchist, has been vainly sought by the police since the assassination of Alexander II, and the other is a beautiful girl named Leonovna, belonging to a prominent official family. It is also stated that these and the men arrested in the street on Thursday have been watching the movements of Governor General Trepoff, Duke Vladimir and Minister of the Interior, Boulguin.

Huntington, W. Va., April 4.—Three persons were killed and one fatally injured in an explosion of the boiler of a portable sawmill near Matwan today. The dead are: John Sandman, aged 16; Green Sandman, aged 19; Henderson, engineer.

KANSAS MAN BUYS LAND.

Spends \$100,000 in Getting Hold of an Illinois Tract.

Duquoin, Ill., April 4.—The entire holdings of the Big Muddy Colliery Company of Benton have been sold to Charles J. Devlin, the multimillionaire coal operator of Topeka, Kan. The deal includes a mine, together with 1200 acres of rich coal land, heretofore untouched. The purchase price is thought to be about \$100,000. Mr. Devlin is said to own the controlling interest in twenty-two mines in the Central states. A modern shaft will probably be sunk on the tract of land at once.

EXTRA SESSION OCTOBER 16.

President Roosevelt Sets Day For Convening Congress.

Washington, April 1.—Senators who called on President Roosevelt today, to consult with him as to the probable time of the reassembling of congress were informed that it was likely a special session will be called for October 16. This will enable members of congress going on the Philippine trip to return in time for the session.

JUDGE RAYMOND TO STAY.

Department of Justice Fully Exonerates Him of Charges.

Washington, April 5.—Judge Raymond, chief justice of Indian Territory, with headquarters at Muskogee, was completely exonerated today from the charges which had been made against him before the department of justice. The exoneration was in the shape of a statement given out by Judge Russell, assistant attorney general, by direction of Mr. Moody, the attorney general. The statement reads as follows:

"The department has investigated charges made against Judge Raymond, chief justice of Indian Territory, and reached the conclusion that there is nothing found or proven warranting his removal from office. In view of this conclusion, it is not deemed the province of the department to enter into a criticism of his conduct. Federal judges in the states hold office for life in order that they may be free from the influence of fear and of other improper motives. Territorial judges may be removed by the president, but as nearly as may be should also be free from such influence. This cannot be if their conduct is to be subject to constant comment by executive officers near the president.

"It is but just to add that the judge's honesty and impartiality have not been seriously questioned, and that he has industriously tried to make an exceptional record for good and rapid work, particularly in the suppression of the liquor traffic, a thing so obviously injurious to the peace and welfare of the population of Indian Territory."

WOULD BURN THE RESORT.

Mob Is Gathering at Springfield For That Avowed Purpose.

Springfield, O., April 5.—A mob very similar to one which a year ago lynched the negro Dixon and burned the house of a man who was charged with the avowed purpose of burning a resort run by Joseph Komper. Nearly a dozen arrests of suspicious acting persons have been made by detectives.

The square in which Kemplar's place is located is being patrolled by police.

At 11 o'clock tonight the front and rear of the saloon are closely guarded by police, as are the entrances to the Columbia street at Foster and Water streets.

Every street corner in the vicinity is filled by a motley crowd awaiting the appearance of a mob to burn the saloon.

In all nearly a dozen arrests have been made for "safe-keeping," and at 11 o'clock the police are confident they have complete control of the situation.

KAISER THEIR PROTECTOR.

Emperor William Made Deep Impression With German Colony.

Berlin, April 4.—The Lokal Anzeiger, in a dispatch from Tangier, says that in replying to the members of the German colony, Emperor William said he was glad to make the acquaintance of the pioneers of Germany in Morocco and to tell them that they had done their duty. They must remain united and continue to fulfill their duty under the emperor's protection. Germany had great commercial interests in Morocco. He, the emperor, would make it his business to promote this trade, which was only possible on the assumption of the equality of all the powers and the sovereignty of the sultan and the independence of the land.

His visit was a recognition of this independence. The speech, the Lokal Anzeiger adds, created an immense impression in the foreign colony at Tangier, especially among the natives who now refer to the emperor as the protector of the independence of Morocco.

Great political significance, it is further asserted, is attached to the fact that the German charge d'affaires accompanied the German emperor to Gibraltar.

STATEHOOD NEXT SESSION.

Senator Beveridge Is Confident of Success Next Session.

Washington, April 5.—Senator Beveridge, who is chairman of the committee on territories, and Chairman Hamilton, of the house committee, have already arranged a program for statehood legislation and expect to have it out of the way within a month or two after the next session of congress meets. It is proposed to take the bill which was practically agreed on between the Republican members of the conference in the last session, and push it through to a conclusion without any delay above that which will necessarily follow in debates in the senate. Senator Beveridge is so confident of success that he is already promising himself considerable leisure after the first month or two of the next session.

Transport Along The Rivers.

St. Petersburg, April 1.—During his forthcoming inspection of the Siberian railroad Minister of Railroads Hilkoft proposes to make an investigative inquiry into the possibility of organizing a big system of transport along the rivers.

No Peace Negotiations Proposed.

St. Petersburg, March 31.—An official news agency says: "In spite of the general inclination in favor of conclusion of the war Russia has not proposed any peace negotiations nor prepared any such conditions."

WARDING OFF OLD AGE.

Simple Calisthenic Exercise That Will Do Much.

A famous French general, when asked how it was that he had such an erect carriage, replied that it was because he bent over and touched the floor with his fingers thirty times every day. If he had acquired rigidity of the spine so that he could not do that, he would have had with it weak abdominal muscles, which result in portal congestion. This portal congestion interferes with stomach digestion and with the action of the liver. The poison-destroying power of the liver is lessened, auto-intoxication results and arteriosclerosis and old age comes on at a much earlier day. By keeping the spine flexible and the abdominal muscles strong and taut the portal circulation is kept free and old age is held off.—Good Health.

Dog Saved Life of Mistress.

Hubbard Goodwin of Torrington, Conn., has a dog which money will not buy. He went to Mrs. Goodwin's bedroom and barked and finally jumped on the bed. Mrs. Goodwin followed him to the kitchen, where she found the front door of the stove wide open and the floor ablaze directly in front of it.

If a girl is really in love, she can be coaxed to be married by a strange pastor.

Try me just once and I am sure to come again. Defiance Starch.

Why Gambling Was Prohibited.

In England, as in Rome, gambling was prohibited, not because it demoralized but because it rendered its devotees effeminate. An act passed in 1541 had in view the double object of "maintaining the artillery and debarring unlawful games." An act passed during the reign of Queen Anne declared that all bonds or other securities given for money won at play or money lent at the time to play with should be utterly void and all mortgages or incumbrances on lands made on the same consideration should be made over to the use of the mortgagee. This continued to be the law until 1845.

BABY ONE SOLID SORE.

Could Not Shut Eyes to Sleep—Spent \$100 on Doctors—Baby Cured Worse—Cured by Cuticura for \$5.

"A scab formed on my baby's face, spreading until it completely covered her from head to foot, followed by boils, having forty on her head at one time, and more on her body. Then her skin started to dry up and it became so bad she could not shut her eyes to sleep. One month's treatment with Cuticura Soap and Ointment made a complete cure. Doctors and medicines had cost over \$100, with baby growing worse. Then we spent less than \$5 for Cuticura and cured her. (Signed) Mrs. G. H. Tucker, Jr., 425 Greenfield Ave., Milwaukee, Wis."

When squashes get into the pie they are considered some pumpkins.

Doctors and medicines had cost over \$100, with baby growing worse. Then we spent less than \$5 for Cuticura and cured her. (Signed) Mrs. G. H. Tucker, Jr., 425 Greenfield Ave., Milwaukee, Wis."

When squashes get into the pie they are considered some pumpkins.

"A scab formed on my baby's face, spreading until it completely covered her from head to foot, followed by boils, having forty on her head at one time, and more on her body. Then her skin started to dry up and it became so bad she could not shut her eyes to sleep. One month's treatment with Cuticura Soap and Ointment made a complete cure. Doctors and medicines had cost over \$100, with baby growing worse. Then we spent less than \$5 for Cuticura and cured her. (Signed) Mrs. G. H. Tucker, Jr., 425 Greenfield Ave., Milwaukee, Wis."
